### WORKING EXPERIENCE

#### 1. LittleLives *Oct 2022 – Present*

##### Project Description:

LittleLives is a school management system for kindergartens. It manages student records, facilitates parent-teacher communication, and tracks attendance. With various modules, it's user-friendly and streamlines school administration.

**Position:** Frontend Developer

##### Responsibilities:

- Developed a comprehensive frontend school management system using TypeScript, Vue.js, and Nuxt.js to create a dynamic and responsive user interface
- Migrated the build system from Webpack to Vite, reducing build times and bundle sizes by 30%.
- Implemented a frontend microservices architecture to ensure maintainable source code and facilitate easy scalability
- Assist in reviewing code and providing constructive feedback to improve code quality and foster a collaborative team environment.

**Used technologies:** Vue 3, Typescript , Vite , Tailwind , GraphQL , MicroFrontend

#### 2. Azibai *Jun 2021 - Sep 2022*

##### Project Description:

Azibai is an e-commerce and social networking site that blends online shopping with social interaction.

**Position:** Frontend Developer

##### Responsibilities:

- Developed and maintained features for a social networking platform, including user profiles, messaging, and activity feeds,...
- Refactored and optimized existing code to comply with Nuxt's new structure and best practices.
- Improved Google Lighthouse scores for performance, accessibility, best practices, and SEO by 25%..

**Used technologies:** Nuxt 2,ElementUI , tailwind , ....

### Freelance Projects

#### 1. PropertyAccess

##### Project Description:

An online real estate platform for the Philippines, featuring a comprehensive database of properties for sale and rent. It offers user-friendly search tools, detailed listings, and virtual viewings.

**Used technologies:** Nuxt 3, tailwind, algolia search,...

#### 2. Gestaltra

##### Project Description:

Gestaltra enables managers to initiate 360 surveys for their own team members within minutes, without the need for lengthy setup or training.

**Used technologies:** Vue2,nodejs,express, jsPDF , ...

#### 3. Eposo

##### Project Description:

EPOSO is a Korea SaaS platform designed to solve issues like transparency, schedule delays, and issue management in IT projects.

**Used technologies:** Vue3,TS, ...

### PROFESSIONAL SUMMARY
