WORKING EXPERIENCE

1. LittleLives (littlelives.com)

June 2021 – Present

Project Description:

LittleLives is a school management system for kindergartens and primary schools, designed to manage student records, facilitate parent-teacher communication, and track attendance, offering a streamlined, user-friendly platform for school administration and engagement.

Team size: 8

Position: Front end Developer

Responsibilities:

- Creating intuitive interfaces tailored for educators and parents.
- Building interactive and dynamic features for managing student and school data.
- Utilizing TypeScript for robust and maintainable code.
- Working with backend services for data exchange.
- Ensuring the application is fast and scalable.

Used technologies: Vue 3, Typescript , Vite , Tailwind , GraphQL , MicroFrontend

2. Property Access (propertyaccess.ph)

Freelancer

Project Description:

An online platform specializing in real estate across Asia, offering a comprehensive database of properties for sale and rent. It's designed to simplify the process of buying and renting properties with user-friendly search tools, detailed listings, and virtual viewing options.

Team size: 3 members

Position: Front end Developer

Responsibilities:

- I was a member of a three-person team that developed a cutting-edge Global (Philippines, Korea, etc.) real estate selling platform using NuxtJS.
- Successfully launched the Philippine Real Estate Selling Platform, which gained traction among real estate professionals, buyers, and sellers.
- The user conversion rate by optimizing the website's performance and implementing efficient user flows.

Used technologies: Nuxt 2,ElementUI , tailwind ,....

3. ZAIWEALTH (zaiwealth.com)

Freelancer

Project Description:

A groundbreaking real estate platform in Asia utilizing Web3 technologies for decentralized and secure property transactions. It simplifies buying, selling, and renting through blockchain-enabled processes, offering a transparent and efficient user experience.

Team size: 2

Position: Front end Developer

Responsibilities:

- Ensured that the UI was optimized for performance and adaptability on devices.
- Built the entire UI for a Web 3.0 real estate project.

Used technologies: Nuxt 3, tailwind, algolia search,...
